HARSH NILAY

Data Analyst | Biotechnology Graduate

harshnilaysingh62@gmail.com | +91 8210878393 | Delhi, India

Professional Summary

Analytical and results-driven B.Tech Biotechnology graduate transitioning into Data Analytics, combining strong research and problem-solving abilities with hands-on expertise in Excel, SQL, Python, and Power BI. Experienced in data cleaning, statistical analysis, visualization, dashboard development, and transforming complex datasets into actionable business insights.

Internship Experience

Microbiology Intern, Dr. Reddy’s Laboratories Ltd.

CTO SEZ, Process Unit–01 | Microbiology Department | 12/2025 – 01/2026

• Supported quality control and laboratory data workflows within a process-driven pharmaceutical environment.
• Collected, recorded, and analyzed laboratory data while maintaining accuracy, consistency, documentation, and compliance.
• Performed environmental monitoring, including air, surface, and water testing, and systematically documented observations and results.
• Applied GMP standards and structured data documentation practices to support reliable reporting and quality processes.
• Interpreted microbial testing results and observations to support quality assurance and operational reporting.
• Developed analytical thinking, attention to detail, data interpretation, and problem-solving skills through exposure to real-world laboratory data workflows.

Education

Bachelor of Technology (B.Tech) – Biotechnology, Lovely Professional University

Senior Secondary (12th): 82% | Secondary (10th): 88% | 07/2026

Technical Skills

Data Analysis: Excel (Advanced), SQL, Python (Pandas, NumPy)
Tools: Jupyter Notebook, Google Sheets, Power Query
Data Visualization: Power BI, Excel Dashboards, Matplotlib, Seaborn
Core Skills: Data Cleaning, EDA, Statistical Analysis, Data Interpretation, Dashboarding, Reporting
